November 25, 2014

Dear Sir/Madame,

I am writing today in response to FCC Chairman Tom Wheeler's recently announced proposal to raise the E-Rate funding cap by \$1.5 billion. The E-Rate program currently represents the only source of federal funding aimed at educational technology and is critical in providing discounts to assist schools (like mine) to obtain affordable telecommunications and internet access. As superintendent in the Wright City R-II School District, Wright City, Missouri, I strongly support the infusion of the additional funding, and urge you to do the same.

We are a medium-sized district on the outer rim of the St. Louis region sitting on Interstate 70. Over the past seven years our free and reduced percentage has risen from around 43% to 54%, with early grades being as high as 61%. Currently we use E-Rate dollars to offset phone and connectivity charges, which allows us to focus resources to the classroom where our academic growth has led Missouri over the past five years. The additional funding proposed by Chairman Wheeler would enable us to more easily move forward with our digital learning initiative without robbing Peter to pay Paul within our budget.

To raise the cap of the E-Rate program by \$1.5 billion, the Universal Service Fund fee will increase by 16 cents per month per account. 16 additional cents per month—less than half a penny per day—totals to an additional \$1.92 per year, approximately the cost of a cup of coffee. This proposal is both reasonable and justified, asking contributors to forgo one cup of coffee over the course of a year to ensure that our nation's schools and libraries are connected to the internet in a way that supports 21st century learning and prepares them for post-secondary opportunity.

No one questions that it is time to ensure that our libraries and schools are connected with the quality of connectivity that is sufficient and scalable for today's ever-growing connectivity needs. In less than twenty years since Congress established the program, E-Rate played a critical role in transforming levels of connectivity from less than one-quarter of schools and libraries to nearly all connected today. The E-Rate program's work is not done: Achieving the laudable broadband goals adopted by the Commission in July will require additional investment. The biggest obstacle the E-Rate program faces, even with the recent changes, remains the strain of increasing demand for E-Rate-supported services and persistently low funding.

The single most effective step the FCC can take to bolster E-Rate's current and future success is to ensure that the program's funding is adequate to support, in a sustainable manner, the program's changes and goals as adopted in July. Chairman Wheeler's proposal does just that, representing a deliberate effort to expand educational opportunities for our nation's students. By focusing on high-capacity broadband

connections to the internet (particularly those in rural communities) and providing sustained, additional funding to the E-Rate program, the modernized E-Rate will ensure the nation's schools—including mine—are able to keep pace with ever increasing connectivity needs.

Thank you for considering my response as you move forward with your decision on the E-Rate program and its funding. I applaud Chairman Wheeler and the FCC for its continued efforts to protect the already oversubscribed E-Rate program by ensuring the future of this successful program.

Sincerely,

A handwritten signature in black ink, appearing to read 'Chris Gaines', with a stylized flourish at the end.

Chris Gaines, Ed.D.
Superintendent of Schools
